ACT TIME/TEMPERATURE - LEDSIGNS

600mm digits, readable up to 300m

Basically our displays are realized with about 3000mcd ultrabright AlInGaP II Leds for absolute good readable also under direct flat sunlight. The brightness intensity can be dimmed automatically with our optional dimmer in 256 steps.

They are showing alternating time and temperature, optional also the date.

We produce these signs as single or double side models in many different digit heights between 80mm and more than 1,8m (for readable up to 900m)

ACT Time/Temperature Displays are equipped with an DCF receiver. This solution guarantees always a correct time information and realizes automatically the changing from wintertime to summertime and vice versa. The receiver communicates with the atomic clock in Frankfurt. Radio and television stations all over Europe use DCF as a time reference. As an option we can also deliver it with GPS instead of DCF for countries out of Europe or with 2 simple buttons to adjustable.

200mm digits, readable up to 100m

produced for Coca Cola Croatia, 800mm digits, readable up to 400m

ACT STREET AND PARKING INFORMATION DISPLAYS

Our solid displays resist all weather conditions.

Basically our outdoor displays are realized with up to 3000mcd ultrabright AlInGaP II Leds for absolute good readable also under direct flat sun. The brightness intensity can be dimmed for the most of our signs in 256 steps automatically by an optional dimmer.

We produce also for communities displays for mounting cross over the street, for using as city-information display. There also traffic informations can be shown.

Most of them are controlled by GSM-modem and are used for actual city- and traffic information.

ACT produces a big range of led-signs for traffic and parking applications.

ACT not only offers you a standard range of products, but also specials and turn-key projects
